

The decision to have the 'no call' law has been GREAT. No more phone calls to deal with that are unwanted. I have never purchased or agreed to dealings with an over the phone random call in my 35 years married. These are a intrusion and due to the fact that most of those you speak with are not willing to give their information, use false names and can be rude at times, real pushy and that is why I support this law.

Please keep it on the books, give us what little privacy we have left. Let them mail things out, it's better that dealing with someone on their time schedule which is usually no my schedule.

Thank you!
